## SPRING/SUMMER 2016 COLLECTION

COSATTO baby stuff with personality®

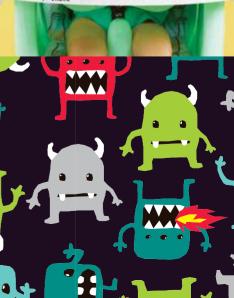

## LABOUR OF LOVE

Creating your SS16 brochure. It's been emotional. Exhilarating. Kaleidoscopic.

We've been jammin' with pink cows. Having a raindance off. In public. Wearing wetsuits and pink bows. In public. Entertaining eccentric aunties. Researching biscuits. A lot. Time travelling. Always back in time for tea - silly sushi of course. All will be revealed.

We bring sparkle to your baby joy. Stopping at nothing. Except the wetsuits in public. It's all in a day's work when you're Saving the World from Boring Baby Stuff.

No matter how crazy, we're with you every step of the way. Your instincts, our experience. Together we make a good team.

THANKS FOR BEING SO (OSATTO.

# design of the times

It starts with an idea, a feeling. Months later a pattern is born. Here's how we do it.

### 1. ZOOM THE GLOBE.

The design mood of a season could come from anywhere. We scour international catwalks. We see things in a different light. A Florence sunrise, a crisp Melbourne sky or a dance in Reykjavik rain may do it.

### 2. RADAR. ON.

Our radar is always on. We absorb avantgarde fashion, interior design, architecture, cinema and art. No stone is left unturned on our mission to Save the World from Boring Baby Stuff. No sleep till pattern.

### 3. REPORT BACK.

The trends we've spotted trickle down into themes and colour palettes. Mood boards and questions emerge. Does it fit us? Will it fit you? Trends have to jump through hoops to make it onto your future stuff.

## 4. DO THE RESEARCH, LOTS.

### 5. FOLLOW YOUR HEART.

### 6. BE A PROUD PARENT.

From studying kids' pattern preferences to seeing what gets the most smiles on the street, all kinds of research goes into our stuff. Plus as parents we know what we love. Your dot's at the centre of our pattern process.

Your feedback helps shape our patterns. From sharing on social, to focus sessions with parents, patterns are tweaked and teased. Does it make us cry? Does it make you cry? Happy cry obviously. That's the power of pattern.

The birth of a pattern. It's a powerful, utterly creative and exciting process. Giving birth to a baby is too. Can't wait to do it all over again. Until then. Ask big questions. Stay curious. Never stop exploring. Break into song if necessary.

Your baby's safety is our obsession. This means you can have confidence in world class products that are tested above and beyond European safety standards. That's just for starters.

Our dedicated technical team scrutinise everything over and over until each product meets our own stringent requirements too.

We also real-life test for your anticipated usage. If a test doesn't exist we invent it ourselves.

All our products are then extensively user-trialled by parents before they finally make the grade. They don't just test our stuff. They live it.

We constantly assess, redevelop and test our products in conjunction with leading European independent test bodies and you guys. Your feedback is vital.

Unless our products are beyond tough, they don't get the green light.

## cover like no other

We wanted to give you a guarantee like no other. We set about it the same way we create your stuff – crafted for long-term love, crafted for real life. The 600-journeys-a-year type real life.

The world sat up and took notice when we introduced it. We thought of everything you could possibly need then went beyond that. That's why our 4 year guarantee is revolutionary. It covers that journey from dot to kid. That's a peaceful little lifetime of use.

With our above and beyond product testing and intense product development, we think it's unlikely you'll need this guarantee - but that's not the point.

Once you buy your Cosatto you're in the family.

## REVOLUTIONARY REASSURANCE

We bring you a lifetime of support and an industry-leading guarantee.

That's the Cosatto promise.

## EASY CHECK-IN

Just book in online or phone. We'll do the rest.

## HOME COLLECT

This is big. We collect, repair and return your product in 5 working days. You stay where you are. Simple.

## PRIORITY SPARES SERVICE

Request spare parts by 4.30pm and you'll get them the next day.

## INTENSIVE AFTERCARE

The Cosatto Cuddle is our promise of outstanding cover, advice, peace of mind and revolutionary service excellence.

T&C's apply - see Cosatto.com for more info

## THINGS TO CONSIDER

## travel systems

## What is a Travel System?

A travel system is a pram or a pushchair that can carry a car seat. Simple.

## What can Cosatto Travel Systems do?

More than a pram, they convert from pram, to pushchair to car seat carrier and more. No need to buy separates. They're all you need from dot to to to pre-schooler (up to 15kg).

## Why should I choose a Cosatto Travel System?

Our travel systems adapt. They grow with your dot. Also they are all awesomely adjustable – from handle height, to foot rest, from hood position to multi reclining pushchair seat. They're all-inclusive, coming with Cosy Toes footmuff, headhuggers, chest pads and raincovers. They're also ultra compact, easy-store folders that fit in your car boot. Choose from 3 or 4 wheels. Choose Cosatto travel systems. Get out there.

## TWO-WAY TALENTS

Roll your dot facing you for walk-talk bonding or let them face out and greet the street.

## FROM-BIRTH OPTIONS

Push your newborn in a travel system with pop on-and-off carrycot. Alternatively, choose a travel system that's a solo intuitive unit with newborn recline built-in. We've a system whatever your set-up, storage space or style.

OSATTO

## (LEVER (AR SEAT (ARRIERS

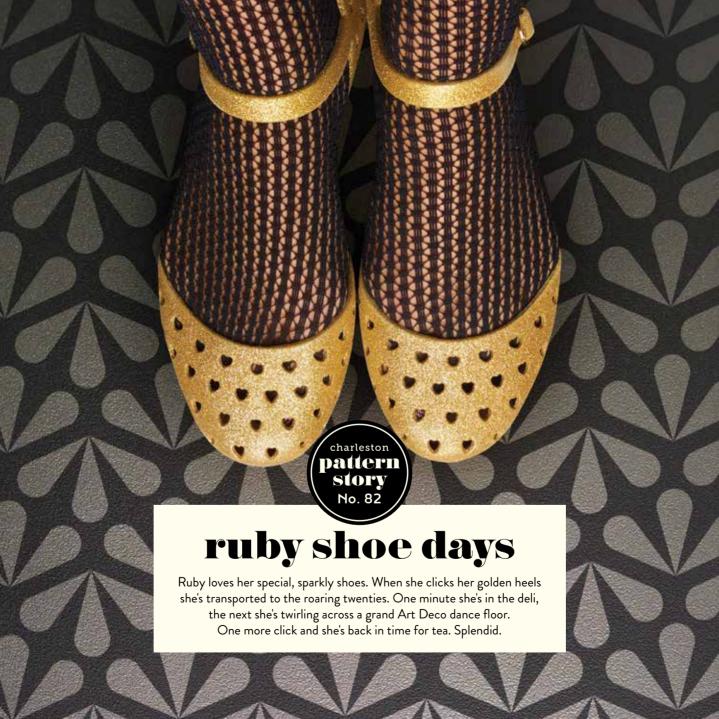

Move your dot from car to street with no wake ups. Just pop our Hold or Port 0+ infant car seats (sold separately) on and off the chassis. (See from p66)

## OSATTO TRAVEL SYSTEMS MADE OF?

## REVOLUTIONARY DESIGN

One day we had a lightbulb moment. What if we could make a travel system that was public transport friendly, lightweight and umbrella-folding? We got busy. We created the ultimate companion for high-speed gadding about. It's the most portable travel system yet. To the untrained eye, it's a pushchair. You know different. Meet the multi-talented To  $\upbeta$  Fro. (p30)

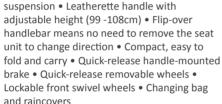

## OOBA TRAVEL SYSTEM

### OOBA - TRAVEL SYSTEM

go brightly pattern story No. 04

## miss bright-socks

Nancy loved how her toy kaleidoscope washed the world in colour. One day it got lost. That day all the clothes came out of the washer covered in crazy coloured patterns. The kaleidoscope came out too. Her mum said the kaleidoscope was trying to make the world a brighter place. Her dad said it was a rogue sock on a mission. Even now, Nancy still wears crazy socks.

## trendsetting transformer

Giggle 2 is an infant carrier, pram and 2-way pushchair extraordinaire.

## GIGGLE 2 TRAVEL SYSTEM

## THINGS TO CONSIDER

## push chairs

## So what exactly is a pushchair?

A pushchair is a buggy is a stroller. Same diff. Cosatto pushchairs bring wheels to your little wonder with clever accessories. Lightweight and foldable, they're great for gadding about if you don't want the whole enchilada in one go.

## When do I need a Cosatto pushchair?

Lots of parents start with a travel system then move on to a pushchair when their dot outgrows it. Whenever you're ready, we've got you covered from day one. All our pushchairs have a newborn recline for even the smallest spoozers.

## How does a pushchair differ from a travel system's pushchair mode?

They are more lightweight and tend to be forwardfacing. They also tend to be lower, making it easier for your preschooler to hop in and out. Storage-wise they generally take up less space.

## EVERYTHING YOU NEED

Easy-store, easy-fold heroes, they're compact, car boot-friendly and whizz you from park to shops to older child's school run. Fast. These any-weather warriors have all the cosy accessories as standard. From multi recline to pop-off seat units, from speakers and gadget viewers to adjustable handle height and hoods - there's a Cosatto pushchair to suit you.

## MAGIC GAOGETS

Rainy day dot snuggled away? Thanks to Supa and Supa Dupa's patented 'window on the world' gadget pocket plus speaker, they can view stuff you choose. From flash cards to slide shows of the dog. It's like you're under there with them.

## THE DESIGN IS IN THE DETAIL

From handle bar pips, to matching wheel rims, from contrast print lining, to glossy colour co-ordinating chassis, we're sticklers for detail and obsessed with utterly trendsetting pattern.

## WHAT ARE (OSATTO PUSH(HAIRS MADE OF?

## TWICE THE TALENT

Our double pushchairs have all the skills of singles. Times two. From Supa Dupa with innovative tech to To&Fro Duo, the umbrella-fold that lets each baby face a different way, to Shuffle, the tandem that fits through little gaps.

#### half bus half biscuit

hustle bustle

pattern

story

No. 23

Tom had a very proper, eccentric aunt. She'd rattle her London bus tin and offer him a "buscuit". At first he wasn't sure if she meant a basket, a model bus kit or what. He nodded and smiled and wondered if 'buscuit' was an actual word for a biscuit you would eat on the bus. He was too polite to ask and is still secretly confused to this day. Crumbs!

## car seats

Car seats. The most important protection of all can be the most confusing. Let's keep things simple.

#### What does my newborn need?

Choosing your baby's first car seat is everything. You want them to be the most protected they can be. So do we. From day one you'll need a Group 0+ rear-facing car seat. Also known as an infant carrier, they need to be tough, secure and snug. Choose our Hold or Port 0+ car seats. They're lightweight, sturdy support units that can also fit on our travel systems. You're required to bring your newborn home from hospital in a 0+ car seat.

#### What happens when they grow?

Our car seats do too. Whatever age, whatever stage we've got a car seat to suit. When your growing passenger reaches 9kg it's time to change up. Choose a Group 1 car seat for up to 18kg or a Group 123 car seat with booster, taking your tot through to a 36kg kid.

Never put a child in a passenger seat fitted with an active front airbag. Airbags are designed to protect adults but can have the opposite effect on children.

#### ANTI-ES (APE SYSTEM

Our car seats just got a new extra layer of safety tech. The brand new Cosatto 5 Point Plus System deters determined wrigglers, reducing harness escapes by 90%. Keep your dot fastened in en-route and the world's a safer place.

# WHAT OO YOUR (AR SEATS GO THROUGH BEFORE THEY GET THE GREEN LIGHT?

A lot. Our car seats are burly bodyguards with state-of-the-art safety technology. Not only do we test our car-seats above and beyond EU safety requirements; if a test doesn't exist where we see a need, we invent one. We're working to educate on and eliminate as much road risk as possible. Read more about Cosatto Safety & Research on p6.

Most cars have ISOFIX points. They're car seat anchors for the ultimate click 'n' go convenience. Pop our ISOFIX base under your 0+ car seat. Later, choose our Hug ISOFIX or Hubbub ISOFIX car seats.

#### THE SAFEST NEST

Recent research indicates that 71% of child car seats are either fitted incorrectly or are incompatible with the child or car. We want to change this. We are working with Good Egg Safety, the UK's largest in-car safety campaigner, to increase awareness of the importance of fitting car seats correctly. Go to our 6 Golden Rules of Car Seat Fitting: http://cosat.to/sixgoldenrules

## driving the standards

We take car seat testing further, exceeding tough European standards. We bring extra-mile reassurance - here's how.

#### OUR (AR SEATS ARE:

- Fully tested for compliance with the ECE R44 standard
- Verified by leading European approval bodies
- Subject to our additional performance, wear and durability testing

From state-of-the-art impact shielding to in-sync side impact protection and a choice of bases to suit your car seat, beneath these user-friendly in-car cuddles lies serious safety technology.

#### ISOFIX insight

**ISOFIX** is a global standard system for securing child car seats into a car with anchorage points. If you have an ISOFIX anchoring system in your car, then you can fit an ISOFIX car seat or car seat base. ISOFIX is minimal fuss – just simplicity with a satisfying click that lets you know it's fastened securely.

Universal ISOFIX - 4 points make a car seat Universal ISOFIX.

- Group 1
- Forward Facing
- Top Tether
   ISOFIX Points

Our Hubbub ISOFIX 123 and Hug ISOFIX 123 seats have Universal ISOFIX. With Hold 0+ infant car seat you can use our Hold 0+ ISOFIX base (sold separately). Our Port 0+ infant car seat comes with its own ISOFIX base.

#### **Universal Belted Options**

We also have universal belted bases and Group 1,2 and 3 car seats which are secured with the car's standard 3 point seat belt.

From SS16 onwards all our Group 1 car seats will incorporate the new Cosatto Anti-Escape System. Continuing lines are in transition.

## (HOOSING A (AR SEAT? LIT'S AS EASY AS 123

#### Group 0+

Rear facing Birth - 13kg (Up to 12/15mths approx)

Lightweight and portable, these have a carry handle. It is a requirement to have one to bring your newborn home from hospital. Our Hold and Port are friendly Group 0+ infant car seats.

See our Group 0+ infant car seats from page 66

#### Group 1

Forward facing 9kg - 18kg (9mths - 4yrs approx)

These are super-snug forward-facing car seats that cocoon your child with extra padding and side impact protection.

They are the next stage on from an infant car seat, suitable from 9kg to 18kg (9 months to 4 years approx.\*) with adjustable lie-back positions for naps and long journeys. Our Moova 2 is a fine example of a Group 1 car seat.

See our Group 1 car seats on page 74

#### Group 1,2,3

Forward facing 9kg - 36kg (9mths - 12yrs approx)

These are high back booster seats, in it for the long haul. From height adjustable headrests to extra-cushioned side impact protection - our Group 123 car seats offer a variety of features. These are suitable from 9kg to 36kg (9 months - 12 years approx.\*) Our Hug and Zoomi are mighty Group 123 car seats.

### Group 1,2,3 ISOFIX

These are Group 123 car seats that have Universal ISOFIX. This is the ultimate in click 'n' go convenience and gives extra stability. Our Hubbub 123 and Hug 123 ISOFIX car seats have Universal ISOFIX. Once docked in your car you are free to come and go without repeated belting and reinstallation. In stage 2 and 3, these car seats use a standard in-car 3 point seat belt and with Hug ISOFIX you can also use the ISOFIX points for added stability.

See our Group 123 car seats from page 76

<sup>\*</sup>Cosatto recommend you keep your child in a rearward facing car seat for as long as possible. Never put a child in a passenger seat fitted with an active front air bag. Airbags are designed to protect adults but can have the opposite effect on children.

## The Brand New Cosatto Anti-Escape System

It's here. Another Cosatto first. Car seat harnesses just got a whole new level of security.

Research shows that more than 70% of children wriggle out of their car seat harness, putting them at risk of head, neck, spinal and internal injuries. That's unacceptable. We've built the solution. The brand new Cosatto 5 Point Plus Anti-Escape System. From SS16 onwards all our Group 1 car seats will be incorporating the new Cosatto Anti-Escape System.

"Driver distraction due to toddlers removing their harness is a risk to all road users and pedestrians"

#### - Richard Knight, original 5 Point Plus

Working with the makers of the original, award-winning '5 Point Plus', we've created the next generation of in-car security that goes beyond our existing 'best protection' standard 5 point harness.

We've incorporated the original 5 Point Plus blueprint into our Anti-Escape System, creating an anti-wriggle lockdown. This leaves you free to watch the road instead of your child's escape attempts.

Why do I need the Brand New Cosatto 5 Point Plus System?

Up until now, the standard 5 point harness on all car seats offered the 'best protection' for your child. Each time you buckled up with the standard 5 point harness you did get a bespoke fit. So far so good.

However, children are natural escape artists. With the industry standard 5 point harness they are able to push their hands through the gaps above the red buckle, simply slipping the harness off their shoulders and wriggling free.

Not any more. We've just closed the gap. The brand new Cosatto Anti-Escape System shields those escape gaps, making it virtually impossible for children to escape their harness. We're making your child, you and the roads safer.

In tests, 9 out of 10 children could not wriggle out of their brand new Cosatto Anti-Escape System. That's a result.

The Cosatto Anti-Escape System. Safer child. Safer you. Safer roads.

5 Point Plus™ is a trademark of Systematic Strategy Ltd.

Anti-Escape.
Safer child.
Safer you.
Safer roads.

Two new levels of protection.

- 1. Anti-Escape.
  No slipping the harness up and off shoulders.
- 2. Anti-Distraction. Lets you focus on the road.

## HAPPY HARBOUR

Anchor your dot in **Port**, the handy from-birth vessel with its own ISOFIX base on board.

## PORT GROUP 0+ ISOFIX CAR SEAT

I'M

# high chairs

More than just a chair. Your highchair is a feeding system. It sets your child on their great food adventure. From statement twirler to fixed folder, we've a highchair for you.

#### When do I need a highchair?

Once your baby can support their head and can sit up themselves. This usually occurs at around 6 or 7 months old, but every child differs so be aware.

# What different types of highchair do you do?

From our rotating 3sixti<sup>2</sup>, the king of the kitchen, to our easy-store flat-folding Noodle Supa and lifelong wooden Waffle, we've a chair to suit your child.

Never leave your baby unattended in a highchair. Ensure the harness is fastened at all times.

### GROWING POWER

All our highchairs are from 6 months onwards. 3sixti<sup>2</sup> and Noodle Supa take your diddy diner up to 15kg (around 3 years). Waffle grows with your child right up to 25kg (around 12 years).

### ALL-ROUND COMFORT

Choose 3sixti<sup>2</sup> for full rotation that allows your child to communicate with you wherever you are in the room. Combined with its multi-height smooth lift, it gives a multi-angle approach which helps minimise stretching and bending when mini mouths are on the move. Believe us. They will be.

All our highchairs have Cosatto 'table talk'. This means the trays are removable when your diner is ready to sit up to the table with the grown-ups. Babies are little social beings and this helps them develop chatting skills.

# HANDY, HELPFUL WAYS

Cosatto highchairs are easywean, easy-clean heroes. From washable plastic trays to wipe-clean cushioning, they're splodge-proof.
